

Airl serves as positive alternative to a mostly negative use of the local public airwaves. It provides valuable news and entertainment for my entire family and the community as a whole.

The loss of Airl to an LPFM broadcaster providing other programming would leave many members of my community without a resource for guidance and support. The youth would be the most impacted by this loss by not having a positive resource that they can relate to.

Airl serves the public interest by providing a positive alternative to a community that is full of negative influences. By helping to support values that encourage community support, charity and involvement, Airl contributes to the public interest on a daily basis.
